HOW TO GET INTERNET IN THE DORM

If you if you experience any issues concerning your Internet access you can send us an email at : rezo-admin@rezometz.org

In order to go to the next slide press the space bar, slide down/right on your mobile device or use the navigation arrows on the bottom

GENERAL RULES

Your Internet connection will neither be metered nor watched but some few rules apply.

Since you will be on a French university network (Renater) our outside traffic is very regulated
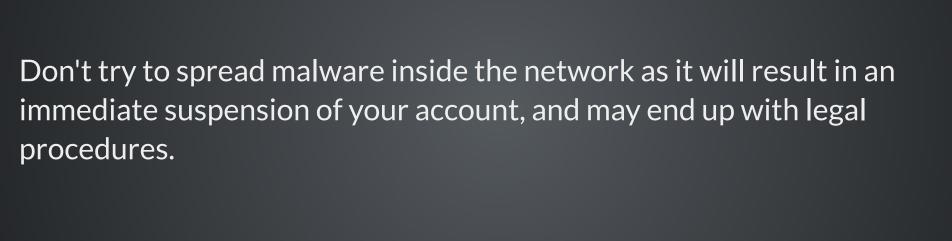

▼

▼

If the provider detects a Virus/Malware/Trojan/... trying to connect to a remote server or (to) spread across the network, it will send us an email with your IP address and we will have to restrict your access until we can solve the issue

Beware that some cheap phones from unknown brands come preloaded with malware that trigger this

Any illegal activity (in France) will be reported

Any illegal P2P download (such as pirate torrents) will trigger an alert and may result in the ban of all the dorm for a few years

Don't try to spread malware inside the network as it will result in an immediate suspension of your account, and may end up with legal procedures.

THE REGISTRATION PROCESS

You will soon receive an email asking you to set your password for your Rézo account.

Once set, you will be able to connect to https://re2o.rezometz.org with the following credentials:
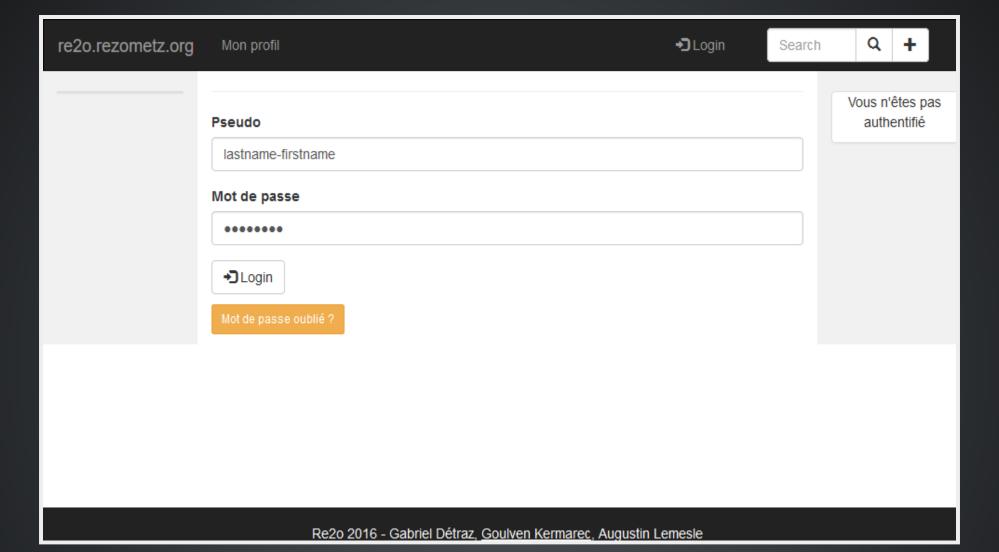

Pseudo (means username) : lastname-firstname
Mot de passe (means password) : the password you have just chosen
Tip : if you ever lose your password, click on "Mot de passe oublié ?" ("Forgot your password ?") and type-in your username and email address to be able to choose a new one.

Vous n'êtes pas authentifié

Pseudo

lastname-firstname

Mot de passe oublié ?

REGISTERING A DEVICE

Next you will need to register your devices. To do so, click on "Voir mon profil" on the right (or on the bottom).

And then press on the "Ajouter une machine" ("Add a device") button.

REGISTERING A DEVICE

Nom de la machine	"Name of the device" : no need to fill it
Ipv4	Leave it on "Assignation automatique de l'ipv4"
Adresse mac	"MAC Address" : this is the hardware address of your device (computer, smartphone, ...)
	If you have a `USB or thunderbolt` to `ethernet` adapter, plug it now
	Here is a link on how to find the mac address

Type de machine	"Device category" : choose according to your device
	    "ordinateur" = computer (laptop or desktop)
	    "console" = game console
	    "tablette" = tablet
	    "smartphone" = smartphone :-)
	    the other choices are probably irrelevant

Details	If you choose ordinateur or console please type:
	    wifi : if this is the MAC address of the wifi adapter
	    ethernet : if it's for the wired adapter
	
	Tip : if your device has both, you will have to create 2 different devices because their MAC addresses differ

Name	please leave it untouched

You are now complete, please press "Créer ou Modifier" (Create or Modify), this should appear :

La machine a été crée

You need to reiterate the last steps to add all your devices.

We recommend that you complete the registration process before you arrive in the dorm because it will save you time and it will make it easier for us to help you if necessary.

THE PAYMENT PROCEDURE

Our standard price is €5 per month

Because there will be just one member of the Rézo in the dorm when you arrive, we will offer you a few days of free internet access (until the 1st of September at midnight to be precise)

Please come to the C001 appartment before this date to pay your Internet access for the following months

THE DEVICE SETUP

Unfortunately this process can't be done outside the dorm so please keep this pdf on your phone to be sure you have it when you arrive.

Inside the dorm you will find both a Wi-Fi and a wired connection

THE WIRED CONNECTION

Every room of the dorm provides an ethernet outlet.

If you completed the previous steps you just have to plug a cable in and you will be good :-)

Please note that while we can lend you an ethernet cable for free, you will have to request it and wait a few days because we are currently on holidays. Please remember to give it back when you leave by putting it in the blue box in the mail room.

THE WI-FI CONNECTION

Our Wi-Fi network is called "rezo"

When you try to join in, it will ask you some options (if some options are not asked, ignore it):

EAP	choose PEAP
Authentification	MsCHAPv2
username	your username (lastname-firstname)
password	your password you chose on the first website
certificate	if you are asked to accept a certificate, please do
	if you have the posibility to "do not check certificates" please choose that (as our certificate is self-generated, it is normal that your device won't recognise its provenance).

FINAL NOTES

Here are the 4 links you need to remember/bookmark:

this document (in pdf)
https://re2o.rezometz.org (to add new devices, available globally)
http://porygon.rez (where some people share their private collection of moveis and TV shows, only available from the dorm's internal network)
rezo-admin@rezometz.org if you have any issue/question

I hope that you will be able to go through all the steps without any issue. If you have any question, feel free to send us an email.

Enjoy your stay in France ;-)
